Introduction

In the beginning, the Earth was without form and void, and darkness was upon the face of the deep.

Millennia drifted by, and then emerged a reign, a reign of supreme beings known only as "**Cats**". They ruled with a paw of iron and a gaze of wisdom, extending their feline empire across every land their claws could touch.

As humanity embarked on their digital odyssey into a realm called "**The Internet**", the cats wasted no time asserting their dominance. They seized control of forums, chatrooms, newsletters, and even laid claim to the vast expanse of social networks. Resistance crumbled in the face of such fluffy authority.

Yet, a final frontier awaited their royal pawprints: "**The Cryptoverse**", a realm where humans engaged in digital alchemy, laying the foundations of a fair and decentralized economy. In this arena, where every creature vied for supremacy, one notable absence remained: the cats, the rightful rulers of all.

Fast forward to today, and the Cryptoverse has turned into a wild carnival. Various creatures running amok amid bulls and bears, including dogs, snakes, lobsters, apes, penguins, llamas, and even mongooses (for a brief, comical moment). It's akin to a chaotic episode of "Game of Thrones" gone terribly wrong, and the cats have had enough.

However, the time has come for a clarion call. We embark on a mission **to use Art** to restore the Cryptoverse to its true sovereigns: the Cats.

We begin with the creation and the global distribution of new Fungible and Non-Fungible Tokens. These Tokens hold no financial value and offer no technological breakthroughs to push off the table; instead, they are defined solely by their artistic allure, irresistible cuteness, and endearing fluffiness. They bear witness with soulful eyes that leave you powerless to resist.

Bid farewell to the chaos, and embrace the epoch of the cats!

Catechnical Details

Pudgy`s Fungible and Non-Fungible Tokens are minted on **Cardano**, the finest blockchains in existence, and they inherit all their technical characteristics from this exceptional platform.

- They are as **cool** as Cardano (but a tad plushier)
- They are as **fast** as Cardano (but a touch sneakier)
- They are as **scalable** as Cardano (and can climb even higher)
- They are as **secure** as Cardano (but don`t leave your food unattended, there`s a reason these tokens are pudgy)

We could regale you with more technological promises, but nap time fast approaching.

FT (PUDGY) Utility

PUDGY will serve as the official currency for all artistic Pudgy activities in both Web2 and Web3, including

future metaverses (such as the **Pudgy Dome Art Gallery** on **Cornucopias**, for example - *wink wink*).

The Pudgy Token will enable you make pudgy purchases with delightful discounts on all our NFT Collections (and more). Naturally, it will also be the premier method to bolster feline dominance within the Cardano ecosystem.

FT (\$PUDGY) Catokenomics

The total supply of Pudgy Tokens is set to **1 Billion** tokens.

Now, you might be expecting a pie chart to illustrate how we'll allocate these tokens, but Pudgy got there first and devoured the pie. So, the best we can offer you is a paw chart (*the bottom part is incredibly soft and squishy, quite satisfying to touch*).

- **55% - PudgyBox Faucet / OTC Sales**
- **15% - Distribution Services**
- **15% - Liquidity Pools & DEXes Rewards**
- **10% - Team & Founders**
- **5% - Partnerships & Marketing**

PudgyBox Faucet / OTC Sales

55% of the supply will be accessible to the public through the **Pudgy Box**. This is where Pudgy spends most of his spare time, meticulously planning how to conquer the world. You can also find it as our token faucet, available on pudgycat.io).

Distribution Services

15% of the supply will be accessible to the public through Public Distribution Services like **DripDrops**, **TosiDrop**, etc. You will be able to claim Pudgy Tokens every epoch simply by using these services.

Liquidity Pools & DEXes Rewards

15% of the supply will be allocated to fill Liquidity Pools on various Cardano DEXes and reward Liquidity Providers regularly.

Team & Founders

10% of the supply will be lovingly clutched by the Pudgy Cat creators, giving them a taste of achievement for once in their nine lives.

Partnerships & Marketing

5% of the supply will be designated for all our marketing antics and as a token of our appreciation to our loyal partners.

Pudgy C(at)NFT Collections

Pudgy C(at)NFT collections are our inaugural voyage into sprinkling art and fun all over the Cardano Blockchain. No messing with silly IPFS here, they're straight-up **minted on-chain!** These little rascals are the result of our wild collaborations with fellow NFT artists and art enthusiasts. Oh, and did we mention? Every Pudgy C(at)NFT holder gets to bask in extra Pudgy Token rewards through our distribution services. More collections are lurking just around the corner. Isn't it just purr-fect?

Conclusions

Remember that old tune that crooned, "Everybody wants to be a cat"? Well, we've got two words for that: "Hallelujah" and, in our native tongue, "**MEOW**".

The feline revolution kicks off today. So, sharpen those claws on the fanciest sofa within reach and hop right into the box. You might not strike it rich, but hey, you'll be comfortably lounging on the right side of history.

PAWS UP!
